

## 100mm - 200mm Wide Belt Drum Sander Machine With 1HP - 3HP Feed Motor

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: SKD
- Model Number: 1000-series
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

### Product Specification

- Name: Wide Belt Drum Sander
- Drum Size: 100 Mm To 200 Mm
- Machine Configuration: Top-Only, Bottom-Only, Or Top/Bottom Configuration
- Feed Motor: 1 HP To 3 HP
- Brand: SKD
- Origin: China
- Highlight: **100mm Wide Belt Drum Sander,  
200mm Wide Belt Drum Sander,  
Wide Belt Drum SanaWide Belt Drum Sander

## Product Description

### Wide Belt Grinder

**High Productivity:** These machines are designed for high productivity. They are equipped with fast processing speeds, quick changeover capabilities, and efficient material handling systems. This ensures minimal downtime between tasks, maximizing throughput and overall productivity.

**Energy Efficiency:** The 1000-series machines prioritize energy efficiency. They are engineered with features such as variable speed drives, optimized power consumption, and energy-saving components. This not only reduces operating costs but also aligns with sustainable manufacturing practices.

**Ease of Maintenance:** Maintenance is made simple with the 1000-series machines. They are designed with easy access to critical components, allowing for quick inspection, cleaning, and maintenance tasks. This minimizes downtime and ensures that the machine is always in optimal working condition.

**Scalability:** The 1000-series machines offer scalability options to accommodate future growth and changing production demands. You can easily upgrade or expand the machine's capabilities as your business evolves, ensuring a long-term investment that can adapt to your needs.

**Industry Compliance:** The 1000-series machines adhere to industry standards and regulations. They are designed and manufactured with a focus on safety, quality, and compliance. This ensures that your operations meet the necessary requirements and regulations within your industry.

### MACHINE FEATURES

1. Machines built in widths from 13" to 43" and multiple head frames
2. Dual infeed and outfeed pinch rolls to ensure parts feed through machine properly
3. Individual cam adjustment down to .001" per head for accurate finishing
4. Air-loaded cylinder for automated belt tensioning
5. Automatic abrasive belt tracking to ensure proper belt alignment during operation
