

## Two Edge Rounding Deburring Machine For Aluminum / Copper

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

#### Product Specification

- Name: Edge Rounding Deburring Machine For Aluminum
- Working Widths: 1000mm, 1500mm And 2000mm
- Material Thickness: 0,3mm – 70mm (100mm)
- Discs: Two Large Discs
- Feature: Deburring
- Origin: China
- Highlight: **Two Edge Rounding Deburring Machine, Edge Rounding Deburring Machine For Aluminum, Copper Deburring Machine**

## Product Description

### Metal Deburring Machine

#### General

The belt and disc metal deburring machine is a versatile tool that is equipped with two deburring discs and two edge rounding discs. During the throughfeed process, the discs oscillate continuously over the workpiece. This unique combination of rotation and large oscillation stroke ensures high-quality deburring and edge rounding results.

Metal Deburring Machine is a device specially used to remove burrs, sharp edges and corners from the edges, holes and surfaces of metal workpieces. Deburring is an important step in the metal processing process that improves the quality, safety and aesthetics of the workpiece.

#### SPECIFICATIONS

Two large discs both at infeed side and outfeed side

Large oscillation stroke over full width of the feed belt

All inside and outside edges are processed from all angles and directions

Smallest part size: 20mm x 20mm

Material thickness: 0,3mm – 70mm (100mm)
