Smooth Surface Deburring Machine For Aluminum / Copper / Brass

Basic Information

Place of Origin: ChinaBrand Name: SKDMinimum Order Quantity: 1 set

• Price: USD10000-350000

• Packaging Details: Shrink Wrapped or Woodcase

• Delivery Time: 20-60 days

Payment Terms: TT

• Supply Ability: 70-100set per year

Product Specification

Name: Smooth Surface Deburring Machine

Working Width: 1100 And 1350 Mm
Control: HMI-controller
Workpiece Thickness: 0.8-100 Mm
Grinding Belt Drive Up: 11 KW

• Finishing: Sheet Metal , Stainless Steel, Aluminum,

Copper, Brass, Etc

• Highlight: Copper Surface Deburring Machine,

Aluminum Surface Deburring Machine, Brass Surface Deburring Machine

Product Description

General

This machine is designed specifically for surface finishing of sheet metal, whether in wet or dry conditions, with the aim of refining, modifying, or shaping the substrate. Sanding is a widely-used method for finishing different materials, employing abrasive heads or disks to achieve a smooth surface. The primary objective of the finishing process is to enhance the aesthetic appeal, durability, and other desirable characteristics of the final component.

Technical Data

Working widths 1100 and 1350 mm	Grinding belt length 1900 mm
Working height 800-900 mm (variable)	Infinitely adjustable feed speed (1–10 m/min)
Version with 1 to 2 grinding stations	HMI-controller
Workpiece thickness 0.8-100 mm	Grinding belt drive up to 11 kW
