

13 Inch- 43 Inch Wide Belt Sander For Metal Robust Construction

Our Product Introduction

for more products please visit us on skdmachinery.com

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Model Number: 1000-series
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Wide Belt Grinder
- Belt Width: 13 Inch To 43 Inch
- Motor Size: 5 HP To 30 HP
- Types Of Heads: Drum, Scotch-Brite, Brush And Disc
- Feed Motor: 1 HP To 3 HP
- Orign: China
- Highlight: **13 Wide Belt Sander For Metal,
43 Wide Belt Sander For Metal**

Product Description

Wide Belt Grinder

Certainly! Here's some additional information about the 1000-series machines:

Robust Construction: The 1000-series machines are built with a heavy-duty construction that ensures durability and longevity. They are designed to withstand rigorous applications and provide reliable performance even in demanding environments.

Compact Design: Despite their heavy-duty capabilities, these machines feature a compact design. This makes them ideal for job shops with limited space, as they can fit into smaller work areas without compromising on performance.

Versatile Applications: The 1000-series machines are highly versatile and can be used for a wide range of applications. They excel at tasks such as deburring, dross removal, calibrating/dimensioning, edge radiusing, and finishing. This versatility allows them to meet the diverse needs of job shops with different requirements.

Top and Bottom Configurations: These machines are available in both top and bottom configurations. The top configuration allows for easy loading and unloading of workpieces, while the bottom configuration offers enhanced stability and support during the grinding or finishing process. This flexibility allows operators to choose the configuration that best suits their specific needs.

Durability and Reliability: The 1000-series machines are designed to deliver consistent and reliable performance. They are built to withstand the rigors of heavy use and provide high-quality results consistently. With their robust construction and reliable components, these machines are built to last.

Overall, the 1000-series machines combine heavy-duty construction, compact design, versatility, and reliability. They are well-suited for job shops that require a powerful and dependable solution for a variety of applications while optimizing space utilization.

MACHINE FEATURES

1. Machines built in widths from 13" to 43" and multiple head frames
2. Dual infeed and outfeed pinch rolls to ensure parts feed through machine properly
3. One- to three-head configurations with drum, brush, disc or combination drum/brush/disc heads
4. Air-loaded cylinder for automated belt tensioning
5. Automatic abrasive belt tracking to ensure proper belt alignment during operation
