

Metal smooth / clean Surface Deburring Machine For Removing Burrs

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Metal Deburring Machine
- Origin: China
- Working Widths: 1000mm, 1500mm And 2000mm
- Material Thickness: 0,3mm – 70mm (100mm)
- Discs: Two Large Discs
- Feature: Deburring
- Highlight: **Smooth Surface Deburring Machine,
Clean Surface Deburring Machine,
Metal Surface Deburring Machine**

Product Description

Metal Deburring Machine

General

The Metal Deburring Machine is a versatile tool designed specifically for removing burrs, sharp edges, and corners from metal workpieces. It is used to enhance the quality, safety, and aesthetics of the workpiece. Deburring is a critical step in the metal processing process, as it helps to eliminate any unwanted imperfections that may affect the functionality or appearance of the finished product. The Metal Deburring Machine efficiently and effectively removes these burrs, sharp edges, and corners, resulting in smooth and clean surfaces. By utilizing this machine, manufacturers can achieve higher-quality workpieces and improve overall product performance.

SPECIFICATIONS

Two large discs both at infeed side and outfeed side

Large oscillation stroke over full width of the feed belt

All inside and outside edges are processed from all angles and directions

Smallest part size: 20mm x 20mm

Material thickness: 0,3mm – 70mm (100mm)
