

## Metalworking Wide Band Sander 1 Head - 3 Head For Remove Burrs / Sharp Edges

Our Product Introduction

for more products please visit us on [skdmachinery.com](http://skdmachinery.com)

### Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

### Product Specification

- Name: Metalworking Wide Band Sander
- Motor Size: 10 HP Or 15 HP
- Floor To Table Height: 31-3/8" To 37-3/8"
- Number Of Heads: 1
- Feed Speed: 5-25 FPM
- Shipping Weight: 2,150 Lbs
- Feature: Heavy-duty Welded Frame
- Highlight: **Metalworking Wide Band Sander,  
Wide Band Sander 1 Head,  
Wide Band Sander 3 Head**

## Product Description

### Wide Belt Deburring

1. Metal Wide belt Sander

2. Deburring, Grinding, Slag Removal, Straight Grain Finishing

3. The Metalworking Wide Belt Sander offers a cost-effective solution for upgrading deburring and finishing operations, eliminating the need for time-consuming hand grinding. With its compact design, this machine provides a quick and efficient way to remove slag, grind vertical burrs, and achieve straight grain finishing, including the removal of some mill scale.

By investing in the Metalworking Wide Belt Sander, you can enhance productivity and save valuable time. Its easy-to-use features allow for a seamless change of the abrasive belt, enabling smooth transitions between different surface finishing tasks. This versatility makes it a valuable addition to any metalworking operation.

In summary, the Metalworking Wide Belt Sander provides a cost-effective and efficient alternative to hand grinding, streamlining deburring and finishing operations. Its compact size and ability to handle various tasks make it a valuable tool for achieving high-quality results while saving time and effort.

4. The Sander was developed to fit the needs of both small metalworking shops, as well as, large production facilities looking for an easy way to run small projects "off-line" from their main production flow. With a small footprint and the ability to mount on casters, this machine is portable enough to fit almost any shop. Don't let the small size fool you, the EZ Sander is loaded with features and is heavy-duty enough to provide years of dependable, consistent, labor saving production.

### FEATURES

1. 36" wide part capacity
2. 37" x 60" abrasive belts
3. Variable speed conveyor at 5-25 rpm
4. 5" bed opening with motorized lift
5. Heavy-duty welded frame

Wide belt deburring is a widely used technique to remove burrs, sharp edges, and surface irregularities from metal and other materials. It involves using a large sanding belt on a wide belt sander or grinding machine, which applies pressure and abrasion to grind and smooth the workpiece.

Wide belt deburring is commonly employed in metalworking industries like manufacturing, fabrication, and machining. It improves the quality, safety, and aesthetics of metal parts by eliminating burrs and sharp edges. This ensures that the final product meets specifications and is safe to handle.

In summary, wide belt deburring is a crucial process in metalworking that enhances the functionality, safety, and appearance of metal components. By removing imperfections and creating smooth surfaces, it adds value to the final product.
