

SKD Safety Metal Deburring Machine For Removing Burrs / Sharp Edges / Corners

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Metal Deburring Machine
- Working Widths: 1000mm, 1500mm And 2000mm
- Material Thickness: 0,3mm – 70mm (100mm)
- Discs: Two Large Discs
- Feature: Deburring
- Orign: China
- Highlight: **SKD Metal Deburring Machine,
Safety Metal Deburring Machine,
Sharp Edge Deburring Machine**

Product Description

Metal Deburring Machine

General

The Metal Deburring Machine is a versatile tool specifically designed for removing burrs, sharp edges, and corners from metal workpieces. It plays a crucial role in improving the quality, safety, and appearance of the workpiece. Deburring is an essential step in metal processing as it eliminates unwanted imperfections that can impact the functionality and visual appeal of the final product. The Metal Deburring Machine efficiently and effectively eliminates burrs, sharp edges, and corners, resulting in smooth and clean surfaces. By utilizing this machine, manufacturers can achieve higher- quality workpieces and enhance overall product performance.

SPECIFICATIONS

Two large discs both at infeed side and outfeed side
Large oscillation stroke over full width of the feed belt
All inside and outside edges are processed from all angles and directions
Smallest part size: 20mm x 20mm
Material thickness: 0.3mm – 70mm (100mm)
