

Versatile Stainless Steel Deburring Machine , Aluminium Deburring Machine Manufacturers

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Metal Deburring Machine
- Discs: Two Large Discs
- Brand: SKD
- Orign: China
- Machine: Versatile
- Feature: Deburring
- Highlight: **Versatile Stainless Steel Deburring Machine, Aluminium Deburring Machine Manufacturers**

Product Description

Metal Deburring Machine

General

The belt and disc metal deburring machine is highly versatile and suitable for a wide range of applications. It offers a diverse selection of disc tools to handle different deburring and edge rounding operations on various materials and part geometries.

A key advantage of this machine is its continuous oscillation of the discs, ensuring consistent and uniform deburring and edge rounding throughout the workpiece. This results in improved surface quality and a smoother finish by effectively removing burrs and sharp edges.

The belt and disc metal deburring machine is widely used in metalworking industries such as manufacturing, fabrication, and machining. It is a reliable and efficient solution for achieving high-quality deburring and edge rounding results on metal parts.

SPECIFICATIONS

Two large discs both at infeed side and outfeed side
Large oscillation stroke over full width of the feed belt
Processing of steel, stainless steel and aluminium
Working widths: 1000mm, 1500mm and 2000mm
Smallest part size: 20mm x 20mm
Material thickness: 0,3mm – 70mm (100mm)
