

Precise Control Metal Edge Deburring Machine 1000mm 1500mm 2000mm Working Widths

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Metal Deburring Machine
- Brand: SKD
- Origin: China
- Working Widths: 1000mm, 1500mm And 2000mm
- Smallest Part Size: 20mm X 20mm
- Material Thickness: 0,3mm – 70mm (100mm)
- Highlight: **Precise Control Metal Edge Deburring Machine,
Metal Edge Deburring Machine 1000mm,
Metal Edge Deburring Machine 2000mm**

Product Description

Metal Deburring Machine

General

The disc edger is equipped with two deburring discs and two rounding discs, providing versatility in its operations. The discs continuously vibrate on the workpiece during the feeding process, combining rotation and high amplitude to deliver superior deburring and rounding results. The machine can also accommodate various platter tools, adding to its flexibility and versatility.

Adjustable vibration and rotation speeds are common features of the disc edger. The vibration speed can be customized based on the workpiece and the desired edge grinding effect. Higher vibration speeds are suitable for thorough deburring and edge processing, while lower speeds are used for lighter grinding and rounding. Similarly, the rotation speed can be adjusted to match the workpiece material and desired processing effect. Precise control of the edge grinding process can be achieved by fine-tuning the vibration and rotation speeds to meet specific processing requirements. It is important to refer to the machine's instructions and operating guide for the correct settings and adjustments.

SPECIFICATIONS

For deburring and edge rounding laser-cut, plasma-cut and water-cut parts

For deburring and edge rounding 3D punched parts

For edge rounding and orbital finishing in one pass

Processing of small parts from 20mm x 20mm

Processing of foil-covered or zinc-plated parts

Processing of steel, stainless steel and aluminium
