

Customized Metal Edge Rounding Deburring Machine 1350mm Max Working Width

Our Product Introduction

for more products please visit us on skdmachinery.com

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Model Number: MS13RR
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Edge Rounding Deburring Machine
- Model: MS13RR
- Max Working Width: 1350mm
- Power: 380v 50Hz Or Customized
- Work Piece Max Width: 1350mm
- Number Of Heads: 2
- Highlight: **Metal Edge Rounding Deburring Machine,
Customized Edge Rounding Deburring Machine,
Customized Metal Edge Rounding Machine**

Product Description

Metal Wide Belt Sander

General Description

A metal wide belt sander, also known as a wide belt grinding machine, is a robust industrial tool used for sanding, smoothing, and finishing large metal surfaces. It features a horizontal conveyor belt, typically several inches wide, that is driven by motorized rollers. The belt is coated with abrasive material, such as sandpaper or grinding belts, enabling it to effectively remove material from the metal surface.

The metal wide belt sander is designed to handle either a single wide part or multiple smaller parts, whether processed in a production line or independently. It is equipped with a vacuum sucking work-table that can securely hold even smaller parts, with a minimum size of 100mm, on the conveyor belt. This ensures a reliable deburring or finishing process. Whether used for high productivity in a production flow line or achieving consistent results on smaller parts, this metal wide belt sander is a reliable tool that saves both labor and time.

SPECIFICATIONS

Abrasive Belt Size 2500x1380mm

Motor : 22kw +22kwwith frequency control

Table Lifting Motor: 1.5kw

Number of Heads :2

Sanding Drum Diameter: 240mm

Speed setting of sanding drum: Frequency converter control

Sanding Drum RPM: 1720

Power supply: 380v 50Hz or on request
