

Metalworking Edge Rounding Deburring Machine 3.9 Ton For Slag Removal

Our Product Introduction

for more products please visit us on skdmachinery.com

Basic Information

- Place of Origin: China
- Brand Name: SKD
- Model Number: MS13RR
- Minimum Order Quantity: 1 set
- Price: USD10000-350000
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days
- Payment Terms: TT
- Supply Ability: 70-100set per year

Product Specification

- Name: Metalworking Edge Rounding Deburring Machine
- Function: Deburring, Grinding, Slag Removal, Finishing
- Max Working Width: 1350mm
- Weight: 3.9 Ton
- Conveyor Drive Motor: 5.5kw
- Table Lifting Motor: 1.5kw
- Highlight: **Metalworking Edge Rounding Deburring Machine**
, Edge Rounding Deburring Machine 3.9 Ton

Product Description

Metal Wide Belt Sander

General Description

This is a metalworking wide belt sander for deburring, sanding, polishing, finishing, slag removal and texturing. With 2 powerful sanding drums and vacuum sucking work-table, the metal wide belt sander can process wide metal sheets, plates, middle and small size metal work-piece in an effective way for deburring, grinding and finishing. With a quick change of the abrasive belt, this metal wide belt sander can do slag removal and oxide removal of the metal parts done by plasma cut or flame cut.

The metal wide belt sander is designed for one wide part or multi smaller parts processed in a production line or in an independent way. Vacuum sucking work-table can fix minimum 100mm smaller parts on the conveyor belt to insure a good deburring or finishing. Either high productivity in a flow line or reliable effects for smaller parts, this metal wide belt sander will not let you down, but saving labor and time.

Metal wide belt sanders are commonly used in various industries, including metalworking, automotive, aerospace, and manufacturing. They are designed to handle heavy-duty applications and are capable of removing significant amounts of material quickly and efficiently. These machines are often used for tasks such as removing burrs, grinding weld seams, flattening surfaces, and preparing metal for painting or coating.

FEATURES

This metal wide belt sander has a maximum working width of 1350mm and is suitable for processing larger sized workpieces. It is equipped with a digital thickness readout for precise control of belt height, ensuring consistent sanding results.

The machine's control panel features a motor load gauge and digital display that provides real-time motor load information, allowing the operator to monitor and adjust the sanding process.

To maintain accurate belt alignment, this metal wide belt sander features electronic belt tracking technology to ensure the belt remains centered during operation for optimal performance.

The machine also features a pneumatic belt tensioner that allows easy and efficient adjustment of belt tension to ensure correct contact with the workpiece.

The sander features a high-quality contact roller that effectively removes material and enables a smooth sanding process. The metal wide belt sander features a sturdy welded frame that provides stability and durability for reliable operation in demanding industrial environments.
