Product Description

The 1000-series of machines are built in a heavy duty construction with a smaller footprint designed to accommodate the small to medium shop with various applications such as deburring, dross removal, calibrating/dimensioning, edge radiusing or finishing. This series of machine can be built in one to three heads and also in either top and bottom configurations.

MACHINE FEATURES

Dual infeed and outfeed pinch rolls to ensure parts feed through machine properly

Single, double or triple head configurations with drum, brush or discs heads or a combination drum/brush/or disc heads

Spray headers on both sides of sanding area to keep parts cool and belts clean during operation

Individual adjustment down to .001" per head for accurate finishing

Paper media filtration system with automatic media advance

Air-loaded cylinder for automated belt tensioning

Automatic abrasive belt tracking to ensure proper belt alignment during operation
