

Metal Deburring Machine with 1.5kW Power and Max Working Height of 60mm to Fulfill Customers' Requirement

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

Product Specification

- Color: As Customers' Requirement
- Origin: China
- Number Of Heads: 1 To 3
- Condition: New
- Max Working Height: 60mm
- Safety Features: Emergency Stop Button
- Applicable Industries: Machinery Repair Shops, Other
- Outlet Diameter: 40-400
- Highlight: **1.5kW metal deburring machine,
60mm max height deburring machine,
industrial metal deburring tool**

Product Description

Metal Deburring Machine with 1.5kW Power and Max Working Height of 60mm

Product Attributes

Attribute	Value
Color	As Customers' Requirement
Origin	China
Number Of Heads	1 To 3
Condition	New
Max Working Height	60mm
Safety Features	Emergency Stop Button
Applicable Industries	Machinery Repair Shops, Other
Outlet Diameter	40-400

Product Description

The Metal Deburring Machine is a versatile and efficient piece of equipment designed to provide high-quality finishing for metal workpieces. With its advanced features and precise control system, this machine is perfect for various industries, including metal fabrication, automotive, and aerospace.

Equipped with a PLC control system, the Metal Deburring Machine offers precise control and easy operation, ensuring consistent and accurate results. The user-friendly interface allows operators to adjust settings and parameters with ease, making it ideal for both experienced professionals and beginners.

One of the key features of this machine is its impressive Max Working Height of 60mm, allowing for the processing of a wide range of metal workpieces. Whether you are working with thin sheets or thick plates, this machine can handle the job with ease, delivering excellent results every time.

The Metal Deburring Machine utilizes a Rotary Brush deburring method, which is known for its effectiveness in removing burrs and sharp edges from metal workpieces. This method ensures a smooth and uniform finish, enhancing the overall quality and appearance of the workpiece.

Safety is always a top priority, which is why the Metal Deburring Machine is equipped with an Emergency Stop Button. This safety feature allows operators to quickly stop the machine in case of an emergency, helping to prevent accidents and ensure a safe working environment.

Customers can choose the color of the Metal Deburring Machine based on their requirements, allowing for customization and personalization to suit their preferences. Whether you prefer a sleek black finish or a vibrant red color, the machine can be tailored to match your workshop or company branding.

Overall, the Metal Deburring Machine is a reliable and efficient tool for edge rounding and finishing metal workpieces. Its advanced features, precise control system, and safety features make it an essential addition to any metalworking shop or production facility.

Key Features

- Product Name: Metal Deburring Machine
- Number Of Heads: 1 To 3
- Control System: PLC
- Applicable Industries: Machinery Repair Shops, Other
- Safety Features: Emergency Stop Button
- Outlet Diameter: 40-400

Technical Parameters

Origin	China
Deburring Method	Rotary Brush

Condition	New
Drum Size	100 mm to 200 mm
Safety Features	Emergency Stop Button
Control System	PLC
Applicable Industries	Machinery Repair Shops, Other
Number Of Heads	1 to 3
Outlet Diameter	40-400
Power	1.5kW

Applications

The Metal Deburring Machine, also known as a Brush deburring machine, edge rounding machine, or wide belt deburring machine, is a versatile tool suitable for various industries and applications.

One common application scenario is in metal fabrication workshops where precision and smooth finishes are essential. Its ability to handle a wide range of metal types and sizes makes it ideal for tasks such as removing sharp edges, burrs, and imperfections from metal components.

With a Minimum Order Quantity of 1 set, this machine is suitable for both small-scale operations and larger manufacturing facilities. The Packaging Details of Shrink Wrapped or Woodcase ensure safe transportation and delivery of the equipment.

The Metal Deburring Machine is specifically designed for metal deburring tasks, offering precise results and efficient operation. Its Outlet Diameter of 40-400 and Drum Size ranging from 100 mm to 200 mm make it suitable for a wide range of metal parts and components.
