

Origin Metal Deburring Machine for Smooth and Polished Surfaces

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

Product Specification

- Character: With One Steel Jigs
- Origin: China
- Power: 1.5kW
- Usage: Metal Deburring
- Control System: PLC
- Outlet Diameter: 40-400
- Marketing Type: Hot Product 2022
- Drum Size: 100 Mm To 200 Mm
- Highlight: metal deburring machine for smooth surfaces ,
origin deburring machine polished edges,
metal deburring tool with warranty

Origin Metal Deburring Machine for Smooth and Polished Surfaces

Product Specifications

Attribute	Value
Character	With One Steel Jigs
Origin	China
Power	1.5kW
Usage	Metal Deburring
Control System	PLC
Outlet Diameter	40-400
Marketing Type	Hot Product 2022
Drum Size	100 Mm To 200 Mm

Product Description

The Metal Deburring Machine is equipped with a robust 1.5kW motor, providing ample power to tackle various metal deburring tasks with ease. Its high-performance motor ensures consistent results and reliable operation, making it a valuable asset in any metalworking workshop or industrial setting.

Featuring one steel jigs, this machine is designed for efficiency and convenience. The steel jigs securely hold the workpiece in place during the deburring process, allowing for precise and stable operation. With the ability to accommodate one to three heads, this machine offers versatility in deburring options, enabling you to customize the machine to meet your specific needs and preferences.

With a maximum working height of 60mm, the Metal Deburring Machine can handle a wide range of metal components, from small parts to larger workpieces. Its adjustable settings and flexible configuration make it suitable for diverse metal deburring tasks, providing you with the flexibility to achieve optimal results for your projects.

As a wide belt finishing machine, the Metal Deburring Machine excels in delivering smooth and uniform finishes on metal surfaces. The wide belt design ensures efficient material removal and consistent results, making it ideal for achieving high-quality finishes on various metal workpieces.

Key Features

Product Name: Metal Deburring Machine

Control System: PLC

Number Of Heads: 1 To 3

Marketing Type: Hot Product 2022

Usage: Metal Deburring

Condition: New

Technical Parameters

Attribute	Value
Usage	Metal Deburring
Safety Features	Emergency Stop Button
Applicable Industries	Machinery Repair Shops, Other
Character	With One Steel Jigs

Outlet Diameter	40-400
Marketing Type	Hot Product 2022
Control System	PLC
Number Of Heads	1 To 3
Deburring Method	Rotary Brush
Condition	New

Applications

The Metal Deburring Machine, also known as an edge rounding machine, is a versatile tool that finds application in various industries due to its efficiency and precision. Originating from China, this machine is designed to meet the highest quality standards and is suitable for a wide range of product application occasions and scenarios.

One primary application scenario for the metal deburring machine is in metal fabrication workshops. These machines are essential for removing sharp edges and burrs from metal components, ensuring a smooth and safe finish. With a power of 1.5kW, this machine can handle various types of metal materials with ease, making it a valuable asset for any fabrication workshop.

Another common application occasion for the metal deburring machine is in the automotive industry. Car manufacturers and suppliers often use these machines to deburr and smoothen metal parts, ensuring that the final products meet stringent quality standards. The emergency stop button feature adds an extra layer of safety, making it ideal for high-volume production environments.
