

Origin Metal Deburring Machine with Rotary Brush Deburring Method and Drum Size 100 Mm To 200 Mm

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

Product Specification

- Number Of Heads: 1 To 3
- Deburring Method: Rotary Brush
- Marketing Type: Hot Product 2022
- Drum Size: 100 Mm To 200 Mm
- Max Working Height: 60mm
- Origin: China
- Control System: PLC
- Color: As Customers' Requirement
- Highlight: **rotary brush deburring machine, metal deburring machine with drum, 100mm to 200mm deburring machine**

Product Description

Origin Metal Deburring Machine with Rotary Brush Deburring Method and Drum Size 100 Mm To 200 Mm

Product Specifications

Attribute	Value
Number Of Heads	1 To 3
Deburring Method	Rotary Brush
Marketing Type	Hot Product 2022
Drum Size	100 Mm To 200 Mm
Max Working Height	60mm
Origin	China
Control System	PLC
Color	As Customers' Requirement

Product Description

The Metal Deburring Machine is a high-quality industrial equipment designed for efficiently removing burrs and sharp edges from metal surfaces. This wide belt finishing machine is ideal for use in machinery repair shops and other industrial settings, offering precision and reliability in metal deburring applications.

Originating from China, this metal deburring machine boasts a robust construction and powerful performance to meet the demands of various metalworking industries. With a power rating of 1.5kW, this machine provides the necessary force and efficiency to tackle tough deburring tasks with ease.

Designed specifically for metal deburring applications, this machine offers a wide belt sanding mechanism that effectively smoothens and refines metal surfaces. The wide belt design allows for efficient material removal while maintaining precision and accuracy in the finishing process.

Key Features

Product Name: Metal Deburring Machine

Origin: China

Applicable Industries: Machinery Repair Shops, Other

Marketing Type: Hot Product 2022

Drum Size: 100 mm to 200 mm

Deburring Method: Rotary Brush

Technical Parameters

Origin	China
Usage	Metal Deburring
Safety Features	Emergency Stop Button
Control System	PLC
Character	With One Steel Jigs
Applicable Industries	Machinery Repair Shops, Other
Number Of Heads	1 To 3
Power	1.5kW
Marketing Type	Hot Product 2022

Deburring Method	Rotary Brush
------------------	--------------

Applications

This Metal Deburring Machine is a versatile tool suitable for various applications in the metalworking industry. Whether you are working in a small-scale workshop or a large industrial facility, this machine offers flexible and efficient deburring solutions.

The machine comes with safety features such as an emergency stop button, ensuring a secure working environment. With a drum size ranging from 100mm to 200mm, it can effectively process various metal workpieces, providing consistent and uniform deburring results.

Ideal for deburring sheet metal, metal parts, or components, this machine is available in different colors as per customers' requirements, making it a reliable solution for various metal deburring applications.
