

Other Applications Made Simple with Our Brush Deburring Machine and Emergency Stop Button

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

Product Specification

- Usage: Metal Deburring
- Color: As Customers' Requirement
- Marketing Type: Hot Product 2022
- Character: With One Steel Jigs
- Max Working Height: 60mm
- Outlet Diameter: 40-400
- Number Of Heads: 1 To 3
- Deburring Method: Rotary Brush
- Highlight: brush deburring machine with emergency stop,
metal deburring machine for other applications,
brush deburring tool with safety button

Product Description

Other Applications Made Simple with Our Brush Deburring Machine and Emergency Stop Button

Product Specifications

| Attribute | Value |
|--------------------|---------------------------|
| Usage | Metal Deburring |
| Color | As Customers' Requirement |
| Marketing Type | Hot Product 2022 |
| Character | With One Steel Jigs |
| Max Working Height | 60mm |
| Outlet Diameter | 40-400 |
| Number Of Heads | 1 To 3 |
| Deburring Method | Rotary Brush |

Product Description

The Metal Deburring Machine is a high-quality edge rounding machine designed to efficiently remove burrs and sharp edges from metal workpieces. Manufactured in China, this metal deburring machine is built to deliver consistent and precise results for a wide range of applications.

Equipped with a rotary brush deburring method, this machine is capable of handling various materials with an outlet diameter ranging from 40mm to 400mm. The rotary brush method ensures thorough deburring while maintaining the integrity of the workpiece's surface finish.

Featuring a user-friendly PLC control system, operators can easily program and adjust the machine settings to achieve the desired deburring results. The intuitive interface allows for precise control over the deburring process, ensuring uniformity and efficiency.

Customers have the flexibility to choose the color of the metal deburring machine based on their specific requirements. Whether matching existing equipment or branding preferences, the machine can be customized to suit individual preferences.

Key Features

- **Product Name:** Metal Deburring Machine
- **Number Of Heads:** 1 To 3
- **Drum Size:** 100 Mm To 200 Mm
- **Condition:** New
- **Control System:** PLC
- **Applicable Industries:** Machinery Repair Shops, Other

Technical Parameters

Applications

A Metal Deburring Machine is a versatile tool that can be effectively used in various industries and scenarios due to its efficient performance and reliable results. The product is manufactured in China, ensuring high quality and competitive pricing.

The Metal Deburring Machine is ideal for deburring applications in a wide range of industries, including automotive, aerospace, machinery, and metalworking. Its brush deburring machine feature allows for precise and consistent deburring of metal parts, ensuring a smooth and clean surface finish.

Packaged in shrink wrapped or woodcase for secure transportation, the Metal Deburring Machine has a delivery time of 20-60 days, ensuring timely arrival at the customer's location. The machine is in new condition, guaranteeing optimal performance and durability.
