

## Origin Metal Deburring Machine with Safety Features Emergency Stop Button

Our Product Introduction

for more products please visit us on [skdmachinery.com](http://skdmachinery.com)

### Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

### Product Specification

- Power: 1.5kW
- Deburring Method: Rotary Brush
- Condition: New
- Control System: PLC
- Safety Features: Emergency Stop Button
- Number Of Heads: 1 To 3
- Color: As Customers' Requirement
- Usage: Metal Deburring
- Highlight: **metal deburring machine with safety features, industrial deburring machine emergency stop, metal deburring tool with warranty**

## Product Description

### Origin Metal Deburring Machine with Safety Features Emergency Stop Button

#### Product Specifications

Attribute	Value
Power	1.5kW
Deburring Method	Rotary Brush
Condition	New
Control System	PLC
Safety Features	Emergency Stop Button
Number Of Heads	1 To 3
Color	As Customers' Requirement
Usage	Metal Deburring

#### Product Description

The Metal Deburring Machine is a cutting-edge and highly efficient wide belt deburring machine, classified as a **Hot Product 2022**. This state-of-the-art machine is brand new and comes with a powerful 1.5kW motor, making it a superior choice for deburring and finishing metal surfaces.

With an impressive outlet diameter range of 40-400, this wide belt finishing machine is designed to handle a wide variety of metal workpieces with ease and precision. Whether you are working on small intricate parts or larger metal sheets, this machine offers the versatility and control needed to achieve professional results.

Equipped with a sophisticated PLC control system, the Metal Deburring Machine ensures optimal performance and user-friendly operation. The PLC control system enables operators to adjust settings with precision, monitor the deburring process closely, and maintain consistent quality throughout the production cycle.

When it comes to metal deburring and finishing, the wide belt metal sander aspect of this machine sets it apart from traditional methods. The wide belt design allows for efficient material removal and surface refinement, resulting in smooth, uniform finishes on metal parts. Whether you are working with stainless steel, aluminum, brass, or other metals, this machine delivers exceptional results every time.

Manufactured to the highest standards, this Metal Deburring Machine is built to withstand the rigors of industrial applications while providing reliable performance day in and day out. Its robust construction, combined with advanced technologies, ensures durability, efficiency, and longevity, making it a valuable asset for any metalworking operation.

Investing in the Metal Deburring Machine means investing in precision, productivity, and quality. Whether you are a small workshop or a large manufacturing facility, this machine offers the capabilities and features needed to elevate your metalworking processes to the next level.

#### Key Features

Product Name: Metal Deburring Machine

Power: 1.5kW

Safety Features: Emergency Stop Button

Character: With One Steel Jigs

Condition: New

Marketing Type: Hot Product 2022

#### Technical Parameters

Parameter	Value
Outlet Diameter	40-400
Color	As Customers' Requirement
Marketing Type	Hot Product 2022
Number Of Heads	1 To 3

Drum Size	100 Mm To 200 Mm
Applicable Industries	Machinery Repair Shops, Other
Condition	New
Power	1.5kW
Max Working Height	60mm
Origin	China

## Applications

The metal deburring machine is suitable for a variety of industries, including machinery repair shops and other manufacturing sectors. Its minimum order quantity of 1 set makes it accessible for small-scale operations as well as larger industrial facilities.

With a max working height of 60mm, this machine is capable of handling a wide range of metal components, ensuring thorough deburring with its rotary brush method. The PLC control system enhances operational control and efficiency, making it easy to tailor the deburring process to specific requirements.

Whether it's for deburring sharp edges, removing burrs, or achieving a smooth finish, the metal deburring machine excels in delivering consistent results. The packaging details offer flexibility with shrink-wrapped or woodcase options, providing secure transportation to any location.

In summary, the metal deburring machine, also known as a wide belt metal sander, is a reliable and efficient solution for various metalworking tasks. Its high-quality construction and advanced features make it a valuable asset for enhancing productivity and achieving superior surface finishes in metal fabrication.
