

## PLC Control System Wide Belt Metal Sander for Heavy-Duty Sanding in Machinery Repair Shops

Our Product Introduction

### Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1 set
- Packaging Details: Shrink Wrapped or Woodcase
- Delivery Time: 20-60 days

### Product Specification

- Number Of Heads: 1 To 3
- Max Working Height: 60mm
- Drum Size: 100 Mm To 200 Mm
- Control System: PLC
- Usage: Metal Deburring
- Applicable Industries: Machinery Repair Shops, Other
- Power: 1.5kW
- Condition: New
- Highlight: **PLC control metal sander, wide belt metal deburring machine, heavy-duty metal sander for machinery repair**

## Product Description

### PLC Control System Wide Belt Metal Sander for Heavy-Duty Sanding in Machinery Repair Shops

#### Product Attributes

Attribute	Value
Number Of Heads	1 To 3
Max Working Height	60mm
Drum Size	100 Mm To 200 Mm
Control System	PLC
Usage	Metal Deburring
Applicable Industries	Machinery Repair Shops, Other
Power	1.5kW
Condition	New

#### Product Description

One of the standout features of the Metal Deburring Machine is its outlet diameter range of 40-400, which allows for flexibility in processing different sizes of metal components. Whether you are working on small or large pieces, this machine can handle a wide range of diameters with ease.

Equipped with a **PLC control system**, the Metal Deburring Machine offers advanced control and automation capabilities. This ensures precise and consistent operation, making it easy to achieve the desired finish on your workpieces. The user-friendly interface of the PLC system allows for easy adjustments and customization to suit your specific deburring requirements.

For machinery repair shops and other industries looking for a reliable and efficient solution for edge rounding and finishing, the Metal Deburring Machine is the perfect choice. Its ability to deliver consistent results and high productivity makes it a valuable addition to any workshop or production facility.

Whether you need to deburr sharp edges, remove burrs, or achieve a smooth surface finish, this machine is up to the task. It can handle a variety of metal materials, including steel, aluminum, and stainless steel, making it a versatile solution for a wide range of applications.

The Metal Deburring Machine comes with **one to three heads**, providing flexibility in the deburring process. Whether you need a single head for basic deburring tasks or multiple heads for more complex finishing requirements, this machine can be customized to meet your specific needs.

Safety is always a top priority in any industrial setting, which is why the Metal Deburring Machine is equipped with an **emergency stop button**. This safety feature allows operators to quickly halt the machine in case of any unexpected issues or emergencies, ensuring a secure working environment for all personnel.

#### Features

Product Name: Metal Deburring Machine

Deburring Method: Rotary Brush

Origin: China

Usage: Metal Deburring

Color: As Customers' Requirement

Drum Size: 100 Mm To 200 Mm

#### Technical Parameters

Power	1.5kW
Safety Features	Emergency Stop Button
Drum Size	100 Mm To 200 Mm
Character	With One Steel Jigs
Max Working Height	60mm

<b>Color</b>	As Customers' Requirement
<b>Applicable Industries</b>	Machinery Repair Shops, Other
<b>Outlet Diameter</b>	40-400
<b>Deburring Method</b>	Rotary Brush
<b>Number Of Heads</b>	1 To 3

## Applications

The Metal Deburring Machine is a versatile and efficient tool that is ideal for a variety of applications across different industries. Its advanced technology and reliable performance make it a popular choice for businesses looking to improve their metal finishing processes.

Originating from China, this high-quality machine has a minimum order quantity of 1 set, making it accessible for businesses of all sizes. The packaging details include options for shrink wrapping or wood casing, ensuring that the machine arrives safely at its destination.

With a delivery time of 20-60 days, customers can expect to receive their Metal Deburring Machine in a timely manner. The machine features a drum size ranging from 100 mm to 200 mm, providing flexibility for a wide range of metal finishing tasks.

Customers have the option to choose the color of the machine according to their requirements, adding a personalized touch to their workspace. The Metal Deburring Machine has a maximum working height of 60mm, allowing for efficient deburring of various metal components.

Equipped with a powerful 1.5kW motor, this machine delivers consistent and precise results with every use. Its wide belt finishing capabilities make it suitable for machinery repair shops and other industries looking to enhance their metal finishing processes.

Whether you are working on small-scale projects or large-scale production, the Metal Deburring Machine is designed to meet your needs. Its durability, efficiency, and versatility make it a valuable asset for any business looking to improve their metal finishing operations.
